<b>Pull request:</b> <a href="https://github.com/Katello/katello-installer/pull/97">https://github.com/Katello/katello-installer/pull/97</a>	
<b>Description</b> Currently on the nightly install, when running:  katello-installer  no org or location is created.  When not specifying any options either the install should bail (forcing the user to specify the defaults) or something should be created by default.
