

Foreman - Bug #6891

rake db:seed failure on creating organization

08/01/2014 02:13 PM - Brad Buckingham

Status: Closed	
Priority: Normal	
Assignee: Eric Helms	
Category: DB migrations	
Target version: 1.6.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman/pull/1645	
Description	
<p>If a user changes the name of the default organization (e.g. SEED_ORGANIZATION=myorg) and then runs 'rake db:seed', the seed will fail. It appears that the seed needs to set a current user in order to support creating the organization.</p> <p>The error will look similar to:</p> <pre>\$ rake db:seed [deprecated] I18n.enforce_available_locales will default to true in the future. If you really want to skip validation of your locale you can set I18n.enforce_available_locales = false to avoid thi s message. Seeding /home/bbucking/github/foreman/db/seeds.d/03-auth_sources.rb Seeding /home/bbucking/github/foreman/db/seeds.d/04-admin.rb Seeding /home/bbucking/github/foreman/db/seeds.d/05-taxonomies.rb rake aborted! Associated revisions

Revision 57b6f858 - 08/07/2014 04:21 AM - Eric Helms

Fixes #6891: Taxonomies couldn't be seeded after initial run of seeds.

On a clean run of seeds, a seed prior to the taxonomies sets User.current.
On subsequent runs, errors are thrown since User.current is not thrown
and taxonomy creation expects this.

History

#1 - 08/01/2014 02:14 PM - Brad Buckingham

Note: by changing organization, I mean they are go in to the UI and rename it after the initial seeding is performed.

e.g
initial name=myorg
rename to name=myneworg
re-run the seed

#2 - 08/01/2014 04:44 PM - The Foreman Bot

- Status changed from New to Ready For Testing

- Target version set to 1.7.5

- Pull request <https://github.com/theforeman/foreman/pull/1645> added
