<b>Description</b>	
<p>Because I was testing different setups and messing them up, it becomes a bit tedious to remove all the components of foreman and start again.</p> <p>In ovirt I use engine-cleanup a lot so it would be really great for admins when foreman has one too</p> <p>Something like this</p> <ol style="list-style-type: none"><li>1. foreman-cleanup</li><li>2. yum remove foreman*</li><li>3. yum install foreman</li><li>4. foreman installer</li></ol> <p><a href="http://www.ovirt.org/Features/engine-cleanup">http://www.ovirt.org/Features/engine-cleanup</a></p> <p><a href="https://github.com/oVirt/ovirt-engine/blob/e0f57f0ae5887da0148fc8528a1a32851ec4ac36/packaging/setup/plugins/ovirt-engine-remove/base/core/misc.py">https://github.com/oVirt/ovirt-engine/blob/e0f57f0ae5887da0148fc8528a1a32851ec4ac36/packaging/setup/plugins/ovirt-engine-remove/base/core/misc.py</a></p>

### History

#### #1 - 08/04/2014 06:34 AM - Dominic Cleal

- Related to Bug #6685: foreman-selinux left installed after "yum remove foreman forman-proxy" added

#### #2 - 05/28/2018 07:41 PM - Ewoud Kohl van Wijngaarden

We have a katello-remove script. It'd be good to make that generic enough to also allow cleanups of Foreman.

#### #3 - 05/28/2018 09:13 PM - Martin Bacovsky

That would be good candidate for inclusion in foreman-maintain.

#### #4 - 02/12/2020 08:15 PM - Eric Helms

- Status changed from New to Rejected

We had a katello-remove and deprecated to reduce overhead of maintaining the script and to encourage users to start fresh if they feel they need to start again.
