

Foreman - Feature #6920

enable 'Run Puppet' per individual host rather than as setting

08/04/2014 02:00 PM - Thomas McKay

Status: New	
Priority: Normal	
Assignee:	
Category: Puppet integration	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link: 1126549	Red Hat JIRA:
Pull request:	
Description	
The 'puppetrun' is a server config but is perhaps better suited for a per-host option so it can be associated with roles&permissions and be enabled per host.

The puppetrun_hosts permission can be added to roles already. Per-host setting seems like overkill (adding yet more attributes), I can't see why it's needed.
