

Foreman - Bug #6926

New user with just anonymous role will get 403 Forbidden upon logon to / (redirected to /hosts)

08/05/2014 04:12 AM - Jan Pazdziora

Status:	Duplicate	
Priority:	Normal

Pull request:		

Description

If new user is created with no roles (so I assume it just has anonymous), by default upon logon they get redirected to /hosts and they will see

Permission denied

You are not authorized to perform this action

Please request the required privileges from a foreman administrator

What's more, the HTTP status of this page is 403, which breaks tests.

I believe Foreman should not auto-redirect users to pages they are not able to see. The page /bookmarks works fine.

Thanks for the report, I think we have it covered under [#1632](#). This happened the other day when the default view_hosts permission was removed from Anonymous.
