

Katello - Bug #6927

Capsule installer 'succeeds' very quickly (but fails with no error) if system is not registered.

08/05/2014 04:30 AM - Ivan Necas

Status: Closed	
Priority: Normal	
Assignee: Ivan Necas	
Category: Foreman Proxy Content	
Target version: Katello 2.1	
Difficulty: easy	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link: 1104781	Red Hat JIRA:
Pull request: https://github.com/Katello/katello-installer/pull/96	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1104781	
Description of problem:	
When running a capsule install the install completed within just a few seconds with no error, but there was some information in the logs:	
<pre>[INFO 2014-06-04 11:23:46 main] /usr/share/katello-installer/modules/common/lib/puppet/parser/functions/validate_pulp.rb:21:in `function_validate_pulp' [INFO 2014-06-04 11:23:46 main] /usr/lib/ruby/site_ruby/1.8/puppet/parser/ast/function.rb:33:in `send' [INFO 2014-06-04 11:23:46 main] /usr/lib/ruby/site_ruby/1.8/puppet/parser/ast/function.rb:33:in `evaluate' [INFO 2014-06-04 11:23:46 main] /usr/lib/ruby/site_ruby/1.8/puppet/parser/ast.rb:73:in `safeevaluate' [INFO 2014-06-04 11:23:46 main] /usr/lib/ruby/site_ruby/1.8/puppet/parser/ast/astarray.rb:25:in `evaluate' [INFO 2014-06-04 11:23:46 main] /usr/lib/ruby/site_ruby/1.8/puppet/parser/ast/astarray.rb:20:in `each' [INFO 2014-06-04 11:23:46 main] /usr/lib/ruby/site_ruby/1.8/puppet/parser/ast/astarray.rb:20:in `evaluate' [INFO 2014-06-04 11:23:46 main] /usr/lib/ruby/site_ruby/1.8/puppet/parser/ast.rb:73:in `safeevaluate' [INFO 2014-06-04 11:23:46 main] /usr/lib/ruby/site_ruby/1.8/puppet/parser/ast/ifstatement.rb:25:in `evaluate' [INFO 2014-06-04 11:23:46 main] /usr/lib/ruby/site_ruby/1.8/puppet/parser/ast.rb:73:in `safeevaluate' [INFO 2014-06-04 11:23:46 main] /usr/lib/ruby/site_ruby/1.8/puppet/parser/ast/astarray.rb:25:in `evaluate' [INFO 2014-06-04 11:23:46 main] /usr/lib/ruby/site_ruby/1.8/puppet/parser/ast/astarray.rb:20:in `each' [INFO 2014-06-04 11:23:46 main] /usr/lib/ruby/site_ruby/1.8/puppet/parser/ast/astarray.rb:20:in `evaluate' [INFO 2014-06-04 11:23:46 main] /usr/lib/ruby/site_ruby/1.8/puppet/parser/ast.rb:73:in `safeevaluate'</pre>	
looking at /usr/share/katello-installer/modules/common/lib/puppet/parser/functions/validate_pulp.rb:21:in `function_validate_pulp'	
revealed:	
<pre>raise Puppet::ParseError, "The system has to be registered to a Katello instance before installing the node"</pre>	
for some reason this exception did not trickle up to kafo.
