<b>Description</b>	
Cloned from <a href="https://bugzilla.redhat.com/show_bug.cgi?id=1108864">https://bugzilla.redhat.com/show_bug.cgi?id=1108864</a>	
Description of problem:	
Community kickstart was renamed to "Satellite Kickstart Default for RHEL" in 1102276, but there are additional changes needed:	
<ul style="list-style-type: none"><li>- proper rendering of trademark (Red Hat Enterprise Linux, because both RHEL &amp; RedHat are not allowed AFAIK)</li><li>- remove mention of unsupported RHEL versions (v. 4)</li><li>- remove the Fedora/CentOS template entirely (known as "Satellite Kickstart Default") - if users want to use community OS's, better to get the latest &amp; greatest community template anyway</li></ul>	
<a href="https://github.com/Katello/katello/pull/4240">https://github.com/Katello/katello/pull/4240</a> should probably be merged first.
