Description

Hello,

I'm translating the strings from english to french and encounter a comprehention problem for this string:

"Optional comma-deliminated string containing either 'new,updated,obsolete' used to limit the import_puppetclasses actions"

Can you rephrase it so I can translate it correctly?

Regards,

I have the same problem for the sentence :
"Update a compute attributes set"

Does it refer to a compute resource, a compute profile, other?

Thanks for enlighten me :)

Regards

It's a kind of internal phrase, as it's not referenced in the web UI (this string is in the API). A set of compute attributes is the compute profile settings

for a single compute resource - it's what you see if you go to edit a profile, then click one of the compute resources in the list.
