

Installer - Bug #6932

node-installer: refresh proxy features when proxy settings.yml is updated

08/05/2014 09:37 AM - Bryan Kearney

Status: Rejected	
Priority: Normal	
Assignee:	
Category: Foreman modules	
Target version:	
Difficulty: medium	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link: 1014984	Red Hat JIRA:
Pull request:	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1014984	
Description of problem: If node-installer is re-run with different proxy features enabled each time (like --tftp=false and then --tftp=true), the feature list in Foreman isn't kept in sync as it was fetched when the proxy was first registered.	
Version-Release number of selected component (if applicable): node-installer-0.0.11-1.el6sat.noarch	
How reproducible: Always	
Steps to Reproduce: 1. node-install --tftp false --puppet true 2. check smart proxies list in Foreman 3. node-install --tftp true --puppet true 4. check smart proxies list in Foreman	
Actual results: "Puppet", then only "Puppet"	
Expected results: "Puppet", then "Puppet and TFTP"	
Additional info:	
Workaround: edit the proxy in the Foreman UI and re-save it, the feature list will be retrieved again. In Foreman 1.4, there's a refresh link + API call.	

History

#1 - 08/06/2014 07:14 AM - Eric Helms

- Target version set to 54
- Difficulty set to medium
- Triaged changed from No to Yes

#2 - 08/15/2014 01:17 PM - Eric Helms

- Target version deleted (54)

#3 - 01/13/2015 10:43 AM - Bryan Kearney

- Assignee deleted (Bryan Kearney)

#4 - 12/21/2015 11:48 AM - Eric Helms

- translation missing: en.field_release set to 86

#5 - 03/11/2016 09:46 PM - Eric Helms

- *Project changed from Katello to Installer*
- *Category changed from Installer to Foreman modules*
- *translation missing: en.field_release deleted (86)*

#6 - 03/14/2016 04:20 AM - Dominic Cleal

- *Status changed from New to Rejected*

Foreman 1.4? The installer has refreshed features for a very long time, please re-test.
