

## Katello - Feature #6938

activation keys that have one or more of the associated subscriptions fully consumed should be indicated as unavailable

<b>Description</b>	
Since subscriptions attached to an actkey are not consumed at that point but only referenced, there can be a time when one or more of the subs themselves have no more quantity left. This will result in any attempt to use the act key to register to fail.	
Indicating this in the UI will be very useful to avoid user confusion during debug of registration failures.
