Katello - Bug #6943

Repo Discovery page, repo validations look ugly

08/05/2014 03:02 PM - Partha Aji

Status:	Rejected		
Priority:	Normal		
Assignee:	Thomas McKay		
Category:	Repositories		
Target version:			
Difficulty:	medium	**Fixed in Releases:**	
Triaged:		**Found in Releases:**	
Bugzilla link:	1126986	**Red Hat JIRA:**	
Pull request:			

Description

1) Goto Content->Products
2) Select Repo Discovery
3) paste https://fedorapeople.org/groups/katello/releases/yum/nightly/ as repo to discover
4) Select a couple of repos
5) Create Selected
6) In the create product page, use an existing product but clear the name of repo and hit submit.
Notice you get an error that looks like {"name":["can't be blank","cannot be blank"]}
Instead of a nicer "Name cannot be blank" form message.

- Status changed from New to Rejected

- Target version deleted (Katello Backlog)

Thanks for reporting this issue. This issue was created over 4 years ago and hasn't seen an update in 1 year. We are closing this in an effort to keep a realistic backlog. Please open up a new issue that includes a link to this issue if you feel this still needs to be addressed. We can then triage the new issue and reassess.
