

Katello - Bug #6949

[RFE] make /api/organizations/<org_id>/tasks to accept param:
?state={running,finished,error,<else?>}

08/06/2014 12:09 AM - Walden Raines

Status: Closed	
Priority: Normal	
Assignee: Walden Raines	
Category: API	
Target version: Katello 2.0	
Difficulty: medium	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link: 970600	Red Hat JIRA:
Pull request: https://github.com/Katello/katello/pull/454 1	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=970600	
Description of problem: It is really annoying every time to request the whole list of tasks for the org if one needs the recent running ones (or the failures - for analysing)	
I could just assume that our UI also may refer to this call - so not sure if there is make sense each time to collect and reply with rapidly growing JSON every time.	
Right now I did made sync of RHEL6Server and then: RHEL6.3 (which made dozen of rpm sync/update entries in there); also 2 times promotion failures. So having overall 8 entries there it becomes 2Mb+ and with prettified: 4Mb+ there.	
And I really interested in my tasks of failed and/or running ones only.	
Another option could be: having the list really in "compressed" format and then requesting each task individually (as it already exists)

How reproducible:
always

Steps to Reproduce:
1. just do prepare various stuff for katello-jobs
2.
3.

Actual results:
big reply back on each request of org tasks API call

Expected results:
make param: state

Additional info:
We could reach big performance improvements if there is any UI call on the org tasks :)

Associated revisions

Revision 2c90aa1a - 08/08/2014 10:55 AM - Walden Raines

Fixes #6949/BZ970600: remove unused tasks endpoint.

Tasks are now handled via dynflow making the tasks controller no longer necessary. This commit removes the controller and the related tests and routes.
