Description

hammer-cli-foreman uses field type Reference [1] with custom formatters [2] to display information about associated resources. Katello should have similar formatter to make the output consistent and more condensed.

Original formatter in foreman outputs only names by default:

```
Users:
 1) admin
 2) test
```

and reflects option --show-ids:

```
Users:
 1) admin (id: 1)
 2) test (id: 83)
```

Katello's mutation should be able to display labels.
