

## Foreman - Bug #6996

### Organizations/Locations mismatch

08/07/2014 06:16 PM - Anonymous

<b>Description</b>	
<p>I'm having a terrible time with organizations and locations. I can never assign a host to a location or organization because it tells me "Cannot update Organization to &lt;org name&gt; because of mismatch in settings". This is not a useful answer. I know I can force the application of an organization, but that just winds up twisting my settings in ways which bite me later. Worse, it doesn't tell me what changes it DID make.</p> <p>Please give a more useful error message, or a confirmation box after the force to confirm the changes being made.</p> <p>I'm currently using version 1.5.2, but this occurred during 1.5.1 and 1.4.4 as well.</p>

Hi there,

is there anything new or usefull in the meantime to find out what is actually missing? I have the same problems as the ticket creator, I was wondering if there is a way to find what is missing with dependencies.

Thanks! :)
