fixes #7019 / BZ 1128473 - content search - change to eliminate errors with ambiguous 'id'

This commit is to update a few queries that use 'pluck' to be explicit on the table that the attribute (id) is being plucked from. Without them the user can experience errors like:

Processing by Katello::ContentSearchController#packages as */*

```
Parameters: {"repos"=>{"autocomplete"=>[{"id"=>"13", "name"=>"samrepo"}]}, "packages"=>{"search"=>""}, "content_type"=>"packages", "mode"=>"all", "environments"=>[2], "content_search"=>{"repos"=>{"autocomplete"=>[{"id"=>"13", "name"=>"samrepo"}]}, "packages"=>{"search"=>""}, "content_type"=>"packages", "mode"=>"all", "environments"=>[2]}}
```

PGError: ERROR: column reference "id" is ambiguous
