Description	
<p>The file autosign.conf needs to be in 0644 or puppetca gives an error saying that this file isn't in 0644 but when i click on build for a host, i have an error if this file isnt in 0666 is there a way to have the file in 0644 and the build working??</p> <p>Thank you</p>

just update the owner of the autosign to be the foreman user?

#2 - 03/15/2011 02:39 PM - Arnaud Sourieux

I tried to chown it as foreman:foreman and www-data:www-data with 644 rights

but it still doesn't work when I click on "cancel build"

it only works with 666 rights

i dont know wich process is trying to open it with RW

but why does it tries to open it with for writing??

#3 - 04/12/2011 11:22 AM - Juan José Presa

I've solved permission problem with mode 644. The workaround is chown it as foreman-proxy:foreman-proxy
