| Description | | |
| <p>I have a custom script to populate a new katello installation and after creating a new Product, repository and synch plan, the repo is still not synched.</p> <p>But if at that point, I issue a 'repository list', it will trigger pulp to synch all the repositories.</p> <p>I would prefer for a 'repository list' not to trigger a synch and instead synch every new repository with the 'hammer repository synch' command.</p> | | |
