

Katello - Bug #7069

changing the content view of a content host does not affect the content view of the (Foreman) host

08/13/2014 12:03 PM - Brad Buckingham

Status:	Closed	
Priority:	High	
Assignee:	Brad Buckingham	
Category:	Web UI	
Target version:	Katello 2.0	
Difficulty:	easy	Fixed in Releases:
Triaged:	Yes	Found in Releases:
Bugzilla link:	1123959	Red Hat JIRA:
Pull request:	https://github.com/Katello/katello/pull/4583	

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1123959

Description of problem:

When you edit a Content Host in Katello and change its content view, the change is saved successfully.

However, when you then visit that host in Foreman it is still using whatever content view was previously associated with it.

This disconnect presents a problem, I would think.

1) If I try to install a package, which CV is it coming from? Katello? Foreman?

2) If I try to add a puppet module, which CV is it coming from?

And so on and so forth.

Revision 23eeae69 - 08/15/2014 09:23 AM - Brad Buckingham

fixes #7069 / BZ 1123959 - host<->content host - improve behavior when puppet env, lifecycle env or content view change

This commit is intended to improve the behavior between foreman host and katello content host. More specifically,

- if the foreman host puppet environment changes, we'll attempt to update the content host lifecycle environment and content view

- if the content host lifecycle environment and/or content view changes, we'll attempt to update the foreman host puppet environment
