Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1130272

Description of problem:

Looks like foreman-debug does not include the logs provided by journalctl on systemd-based distros. I'd like to request that foreman-debug handle this specially for reporting issues on RHEL 7 hosts.

The original Bugzilla has been marked as CANTFIX and closed. As a result, we can probably close this issue as well.

Why can't it be fixed? It seems valid and possible to me.

#5 - 07/26/2018 04:17 PM - Chris Roberts

- *Status changed from New to Resolved*

This is working as intended now.
