<b>Pull request:</b> <a href="https://github.com/foreman/foreman/pull/1711">https://github.com/foreman/foreman/pull/1711</a>	
<b>Description</b>	
Most resource types use a string field for the name, so are limited to 255 characters. Subnets use a text field, so have an unlimited length, so should be changed to 255 characters.
