Description	
<p>When using the freeipa_register snippet to provision a RHEL7 system, the client DOES get joined to the IPA realm, but the certmonger request seems to be failing and 'dns_lookup_kdc' gets set to false in /etc/krb5.conf which causes the client to point directly to one IPA domain controller instead of using DNS.</p> <p>After provisioning, I can manually run the 'ipa-client-install' command with the same parameters and everything works fine - certmonger and dns_lookup_kdc are set correctly.</p> <p>Here is the log snippet generated by ipa-client-install during the KS:</p> <pre>Complete! Discovery was successful! Hostname: rhel7b02.corp.follett.com Realm: QA-UNIX.FOLLETT.COM DNS Domain: qa-unix.follett.com IPA Server: imqa-d1-dc01.qa-unix.follett.com BaseDN: dc=qa-unix,dc=follett,dc=com Synchronizing time with KDC... Downloading the CA certificate via HTTP, this is INSECURE Successfully retrieved CA cert Subject: CN=Certificate Authority,O=QA-UNIX.FOLLETT.COM Issuer: CN=Certificate Authority,O=QA-UNIX.FOLLETT.COM Valid From: Tue Jul 29 19:17:32 2014 UTC Valid Until: Sat Jul 29 19:17:32 2034 UTC Enrolled in IPA realm QA-UNIX.FOLLETT.COM Created /etc/ipa/default.conf New SSSD config will be created Configured /etc/sss/sss.conf Configured /etc/krb5.conf for IPA realm QA-UNIX.FOLLETT.COM trying https://imqa-d1-dc01.qa-unix.follett.com/ipa/xml Forwarding 'ping' to server 'https://imqa-d1-dc01.qa-unix.follett.com/ipa/xml' Forwarding 'env' to server 'https://imqa-d1-dc01.qa-unix.follett.com/ipa/xml' certmonger request for host certificate failed Forwarding 'host_mod' to server 'https://imqa-d1-dc01.qa-unix.follett.com/ipa/xml' Could not update DNS SSHFP records. SSSD enabled Configured /etc/openldap/ldap.conf Unable to find 'admin' user with 'getent passwd admin@qa-unix.follett.com!' Recognized configuration: SSSD Client configuration complete.</pre>
