

Katello - Bug #7150

katello-installer --reset can leave elasticsearch in an odd state

08/19/2014 10:54 AM - Justin Sherrill

Status: Closed	
Priority: Normal	
Assignee: Justin Sherrill	
Category: Installer	
Target version: Katello 2.0	
Difficulty: easy	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link: 1131524	Red Hat JIRA:
Pull request: https://github.com/Katello/katello-installer/pull/106	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1131524	
Description of problem:	
katello-installer --reset doesn't stop elasticsearch before clearing all its data in /var/lib/elasticsearch/. There have been a few reports of elasticsearch working strangely (such as not returning results) after a --reset.	
How reproducible: Sometimes	
Steps to Reproduce:	
<ol style="list-style-type: none">1. Install Katello2. run 'katello-installer --reset'3. Click around and create katello objects in the UI/Hammer4. Restart Elasticsearch5. Verify objects are still there	
Actual results: In some cases elasticsearch will be in a bad state	
<pre>\$ curl -XGET 'http://localhost:9200/_cluster/health?pretty=true'</pre>	
shows status RED	
Expected results: Elasticsearch not in a bad state. Cluster status should not be red.
