Pull request:	https://github.com/theforeman/foreman/pull/3992		

Description

In the settings page, there are several tabs regarding global options or plugins options.
- The columns' name like "General", "Auth", ... are not translated
- In the Provisionning tabs, these 2 strings are not translated: * "Certificate that Foreman will use to encrypt websockets"   * "Private key that Foreman will use to encrypt websockets"

fixes #7152 - translate setting category names

History

#1 - 08/19/2014 11:19 AM - Dominic Cleal

Looks like the category names are translated, but not extracted anywhere.

The websockets settings appear to be in Transifex for me, maybe the translated versions haven't been pulled **back** from Transifex yet (
https://www.transifex.com/projects/p/foreman/viewstrings/#fr/foreman/29158086?q=websocket).

#2 - 08/20/2014 07:31 AM - Dominic Cleal

- Subject changed from String not translated in foreman settings (Administer/Settings) and is not available from transifex to Category strings not translated in foreman settings (Administer/Settings)

#3 - 08/20/2014 07:31 AM - Dominic Cleal

- Related to Bug #7167: Setting names are not translated added

#4 - 02/10/2015 02:06 PM - Slava Bendersky

Hello Everyone,
Is any update on this issue ? It impossible preserve setting and replace certificate to commercial one for novnc certificate. And I can't find where settings for it settings.yaml it get ignored.

Slava.
