<b>Description</b>	
Cloned from <a href="https://bugzilla.redhat.com/show_bug.cgi?id=1131668">https://bugzilla.redhat.com/show_bug.cgi?id=1131668</a>	
Description of problem:	
When trying to setup libvirt virsh providers, the foreman supported options are removed from settings.yaml when katello-installer is run.	
For example the following get wiped out:	
:dns_provider: virsh :dhcp_vendor: virsh	
Expect these options not to get removed after running katello-installer
