Pull request:	https://github.com/theforeman/foreman/pull/1813		

Description
The mailers and their templates aren't translated, so users receive reports in English always.

Revision 3a36bdf6 - 10/31/2014 09:22 AM - Stephen Benjamin

fixes #7586, #7734, #7172 - user preferences for receiving mail notifications

Adds a framework for user-selectable mail notifications. The work is
still done in ActionMailer classes and launch by rake in cron, however a
wrapper called MailNotification is used to provide RBAC and make the
association with users.

Plugins may seed their own mail notifications, see
db/seeds.d/16-mail-notifications.rb for an example.
