

Katello - Bug #7186

rubocop fails due to module name change

08/20/2014 04:32 PM - Justin Sherrill

Status:	Closed	
Priority:	Urgent	
Assignee:	Justin Sherrill	
Category:	Tests	
Target version:	Katello 2.0	
Difficulty:	easy	Fixed in Releases:
Triaged:	Yes	Found in Releases:
Bugzilla link:		Red Hat JIRA:
Pull request:	https://github.com/Katello/katello/pull/4598	

Description

Currently when running:

```
bundle exec rake katello:rubocop:jenkins TESTOPTS="-v"
```

which in turn runs:

```
bundle exec rubocop --require rubocop/formatter/checkstyle_formatter --format Rubocop::Formatter::CheckstyleFormatter --no-color --out rubocop.xml
```

this will fail with:

```
uninitialized constant Rubocop
```

as you can see here:

http://ci.theforeman.org/view/Katello/job/test_katello_rubocop/4800/console

It turns out rubocop changed their module name
