Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1132790
This repository defaults to 'false' and no clients will get access to puppet which is contained within the rh-common repository.

We need to add a snippet to the Satellite 6 Katello kickstart template before we install puppet to enable this repo:

```
subscription-manager repos --enable rhel-<%= @host.operatingsystem.major -%>-server-rh-common-rpms
```
