

Katello - Bug #7271

Content view Update allows any valid repository ids to be added

08/26/2014 04:38 PM - Justin Sherrill

Status:	Closed	
Priority:	Normal	
Assignee:	Justin Sherrill	
Category:	API	
Target version:	Katello 2.0	
Difficulty:	medium	Fixed in Releases:
Triaged:	Yes	Found in Releases:
Bugzilla link:	1134057	Red Hat JIRA:
Pull request:	https://github.com/Katello/katello/pull/4615	
Description		
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1134057		
Description of problem:		
Currently PUT /api/v2/content_views/:id/ takes a list of repository ids. These ids are not validated to be only Library ids. As a result a user can post any valid repo id (including repositories that are not in library).		
Version-Release number of selected component (if applicable):		
6.0.3		
How reproducible:		
Always		
Steps to Reproduce:		
1. Issue a PUT request to a content view: /api/v2/content_views/:id/ specifying ids for repositories in another org for example.		
Alternatively you can use hammer to assign repos using their ids as well on the 'hammer content-view update' command.		
Actual results:		
Any repo can be added.		
Expected results:		
Repos that are not in Library within the same org should not be able to be added.		
Additional info:
