Katello - Bug #7309

Error link from failed repository sync gives me a spinner

08/29/2014 04:10 PM - Brad Buckingham

Pull request:	https://github.com/Katello/katello/pull/4627		

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1093483
Description of problem:

When I tried to synchronize a custom puppet repository (http://omaciel.fedorapeople.org/fakepuppet02/) there was an error generated that did not bubble up to the UI or production.log. Once the sync process failed, there was an error link in the UI (see attached screenshot) that when clicked gave me a spinner that never went away

Version-Release number of selected component (if applicable):

How reproducible:

Steps to Reproduce:
1. Use http://omaciel.fedorapeople.org/fakepuppet02/ to create a custom puppet repository
2. Synchronize it
3.

Actual results:

The sync process fails but there's no information as to why it failed

Expected results:

Revision 366d89d0 - 09/03/2014 01:02 PM - Brad Buckingham

fixes #7309 / BZ 1093483 - Repo sync status - update UI cross-links and status based on dynflow task

The Sync Status page was recently updated to sync repositories
using dynflow tasks. With this, all syncs whether they are
initiated by Sync Status, Product or Repository pages should
be executed through dynflow.

That said, the API (which is used for showing sync status on
the Products, Repositories, Content Views and Content View
Filter pages) is currently reporting the status using
pulp; however, that does not provide a true indication of
whether or not the sync process has completed successfully.

This commit will address 2 things:

1. Update the API to return the 'last sync' information using the
dynflow task (vs pulp). This information is then used for displaying
sync time, status...etc.
2. Update the cross-linking for individual repositories on the various
pages to go directly to the dynflow task versus sending the user to the

sync status page. This will allow the user to see
any errors that may have occured without having to search for
the repo once landing on Sync Status and then having to click
again to get to the dynflow task.
