

Foreman - Bug #741

We can't submit again hosts modifications if there was errors in the parameters

03/15/2011 02:56 PM - Arnaud Souriaux

Status:	Resolved

Pull request:		
Description When we try to change or set parameters for a host, and that a parameter is blank or wrong we have an error message (here it is ok ;)) but when we try to submit the good modifications after having this error message, we are redirected to have page saying : "Host not found, please try to update your request" so we have to go back to the Hosts page, select again the hosts and re-do the modifications we should be able to retry to set the host without having to go on the Hosts page

- Status changed from New to Need more information

does the url key change during that phase? e.g.

ususally something like:

foreman/hosts/hostname

is the hostname current?

#2 - 07/05/2012 05:01 AM - Ohad Levy

- Status changed from Need more information to Resolved

not reproducible with 1.0
