

Katello - Bug #7445

RHSCL is packaged in ISO but cannot be used via install_packages

09/15/2014 05:11 PM - Partha Aji

Status: Closed	
Priority: Urgent	
Assignee: Partha Aji	
Category: Installer	
Target version: Katello 2.0	
Difficulty: trivial	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link: 1139894	Red Hat JIRA:
Pull request:	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1139894	
Description of problem:	
The ISO contains RHSCL/* packages, but that directory/set of RPMs is never set up anywhere in the install_packages, so user is never given access to that repo. Ergo, install will fail on deps issues.	
Partial workaround is to use one of:	
yum-config-manager --enable rhel-server-rhsc1-7-rpms yum-config-manager --enable rhel-server-rhsc1-6-rpms	
As appropriate for user's platform.	
Docs note should be something like:	
Note: ISO install users should assure their target sat6 system has access to the RHSCL library, via Red Hat's CDN or other methods (i.e., an existing Satellite 5 content source)
