<b>Description</b>

Description of problem: Automation tests were failing as UI doesn't search usergroup names properly. Initially I thought problem is only with utf8 and latin1 characters, issue is with alpha nd numeric strings too.	
Version-Release number of selected component (if applicable): Sat6 GA Z release Satellite-6.0.4-RHEL-6-20140915.0	
How reproducible: always	
Steps to Reproduce: 1. create usergroup with alpha, numeric, latin and utf8 chars 2. user searchbar on usergroup page to search/filter any one created in step1 3.	
Actual results: Search won't filter the given string	
Expected results: Search should filter the only specified string	
Additional info: no error in logs
