

Foreman - Bug #7507

spice console to libvirt guest provides incomplete image

09/17/2014 11:57 AM - Dominic Cleal

Status: New	
Priority: Normal	
Assignee:	
Category: VM management	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link: 1131464	Red Hat JIRA:
Pull request:	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1131464	
Description of problem: Spice console to libvirt guest provides incomplete image. See attached screenshot.	
Version-Release number of selected component (if applicable): Satellite-6.0.4-RHEL-6-20140813.2 My browser: firefox-31.0-2.fc20.x86_64	
How reproducible: always	
Steps to Reproduce: 1. Setup libvirt compute resource to use "SPICE" as a display type, disable console passwords and create new guest 2. Make sure you have network.websocket.allowInsecureFromHTTPS set if you are on Firefox as per http://theforeman.org/manuals/1.5/#7.1NoVNC 3. Access console of that guest via Satellite 6 webUI	
Actual results: See screenshot.	
Expected results: Whole screen should be displayed.

since this depends on the spice js implementation, does anyone knows if a bug was opened on it? maybe a recent version fixed it?
