Triaged:	Yes	**Found in Releases:**	
Bugzilla link:		**Red Hat JIRA:**	
Pull request:	https://github.com/Katello/katello/pull/4673		

Description

Less rails uses js runtime, which requires execmem kernel feature, that is selinux
disabled by default (for good reasons).

As we compile the assets in build time anyway, no need to require the files
in production.
