### Associated revisions

#### Revision 3a36bdf6 - 10/31/2014 09:22 AM - Stephen Benjamin

fixes #7586, #7734, #7172 - user preferences for receiving mail notifications

Adds a framework for user-selectable mail notifications. The work is still done in ActionMailer classes and launch by rake in cron, however a wrapper called MailNotification is used to provide RBAC and make the association with users.

Plugins may seed their own mail notifications, see `db/seeds.d/16-mail-notifications.rb` for an example.
