Pull request:		

Description

After upgrading to post [#2127](#), the first Puppet report received from each host is triggering an update to populate grub_pass on the host object, which also generates an audit log entry.

This probably should be handled with a DB migration instead.

```
Started POST "/api/reports" for 192.168.122.130 at 2014-09-26 14:05:41 +0100
```

```
Processing by Api::V2::ReportsController#create as JSON
```

```
Parameters: {"report"=>[FILTERED], "apiv"=>"v2"}
```

```
User Load (0.2ms) SELECT "users".* FROM "users" WHERE "users"."login" = 'foreman_api_admin' LIM  
IT 1
```

```
Setting current user thread-local variable to foreman_api_admin
```

```
processing report for puppet.example.com
```

```
