

## Foreman - Bug #7776

### It is possible to register multiple parameters with the same name using the REST API

10/02/2014 10:17 AM - Geir Hedemark

<b>Status:</b> Resolved

<b>Description</b>	
<p>When doing several equal posts to <a href="https://&amp;lt;host&amp;gt;/api/v2/hostgroups/&amp;lt;hostgroupname&amp;gt;/parameters">https://&amp;lt;host&amp;gt;/api/v2/hostgroups/&amp;lt;hostgroupname&amp;gt;/parameters</a> with a json of { "parameter" : { "name" : "foo", "value" : "something" } }, I am able to create several parameters named "foo".</p> <p>When manipulating the same parameters with put on <a href="https://&amp;lt;host&amp;gt;/api/v2/hostgroups/&amp;lt;hostgroupname&amp;gt;/parameters/&amp;lt;internal id of param&amp;gt;">https://&amp;lt;host&amp;gt;/api/v2/hostgroups/&amp;lt;hostgroupname&amp;gt;/parameters/&amp;lt;internal id of param&amp;gt;</a> with the json of { "parameter" : { "value" : "something" } }, an error stating</p> <pre>{   "error": { "id": "3528", "errors": { "name": [ "has already been taken" ] }, "full_messages": [ "Name has already been taken" ] } }</pre> <p>is returned. I feel that this error should also be returned on the second POST above in the interests of providing a clear and orthogonal API.</p>

Is duplicate of Foreman - Bug #6695: Adding two OS parameters with same name ... <span style="float: right;"><b>Closed</b>    <b>07/20/2014</b></span>	

## History

### #1 - 10/02/2014 10:20 AM - Dominic Cleal

- Is duplicate of Bug #6695: Adding two OS parameters with same name doesn't raise any error when values are different added

### #2 - 10/02/2014 10:20 AM - Dominic Cleal

- Status changed from New to Feedback

Thanks for the report, I think we've fixed this via [#6695](#) for Foreman 1.7. If you get the opportunity, please try out our nightly builds to verify.

### #3 - 05/17/2017 09:30 AM - Anonymous

- Status changed from Feedback to Resolved
