

## Installer - Bug #7914

### Unexpected config file loaded if installer is run from foreman-installer src dir

10/13/2014 07:57 AM - Marek Hulán

<b>Status:</b> Resolved

<b>Description</b>	
I think it no longer make sense to load local config files. Users don't run installer from git (they would have to download modules manually anyway) so we can remove local config files loading in <a href="#">foreman-installer script</a> It only makes users confused.

I think this is fixed in <https://github.com/foreman/foreman-installer/commit/6fef25e5d3a41f46bff9794946b2c6faed6c84f5>, which hardcodes the CONFIG\_DIR in bin/foreman-installer when building the package via the Rakefile. It no longer searches for ./config/\*.yaml.
