Pull request:	
Description	
<p>The dashboard page points to a non-https version of the Google jsapi which causes an SSL warning if you're using https.</p> <p>It appears they include an https version which should probably be used by default: https://www.google.com/jsapi</p> <pre>[root@priv foreman]# grep -ri 'jsapi' ./ ./app/helpers/application_helper.rb: "<script src=http://www.google.com/jsapi></script>" ./vendor/plugins/google_visualr/README.rdoc: <script src='http://www.google.com/jsapi'></script></pre>
