

Foreman - Feature #7984

Enhance the audit page to only show the object name

10/19/2014 08:25 AM - Bryan Kearney

Status: New	
Priority: Low

Pull request:	
Description	
The current audit page shows the object and the module it comes from. This makes it kinda ugly for plugins to use audited. A simple enhancement would be to remove the module name

- Category set to Audit Log

Much better would be to make the audited_type helper extendable by plugins, allowing them to make appropriate substitutions. Removing the namespace by default is a bit hacky.

#2 - 10/29/2014 04:49 PM - Bryan Kearney

Do you have other examples of where plugins extend the core features like this? I will work something up based on that example.
