<b>Description</b>		
postinst scripts are currently duplicated in core packages (identical, depending on DB/non-DB subpackages) and plugins (identical apart from plugin name) across all OSes. We should try and deduplicate this with symlinks or similar.		

#### Associated revisions

##### Revision d188386a - 07/18/2022 02:21 PM - Evgeni Golov

Fixes #7988 - unify foreman postinst files

##### Revision 2df30b49 - 07/19/2022 07:33 AM - Evgeni Golov

Refs #7988 - use foreman postinst library for deface too

while deface is not a plugin as such, it is handled as one when it comes to installation/post installation and so we can just re-use our plugin postinstall library for it too.

##### #3 - 11/05/2021 06:49 PM - Evgeni Golov

- Status changed from New to Assigned

- Pull request <https://github.com/foreman/foreman-packaging/pull/7226> added

##### #4 - 11/05/2021 06:52 PM - Evgeni Golov

this is finally getting some traction.

- in <https://github.com/foreman/foreman-packaging/pull/7226> we implemented a shared library that can be used in plugin postinst scripts
- Ewoud asked for improvements to that library to be smarter (auto-detection of apipie and webpack parameters)
- foreman core postinst still need de-duplication
- this library is yet to be used by all the plugins
