

Foreman - Bug #799

AIX "operating system" info not appearing on "foreman/hosts" page

Description		
<p>I have puppet 2.6.4 and foreman 0.1-6 installed on redhat 5.5. On the http://foreman:3000/hosts page I'm not seeing Aix "operating system" information: facter "operatingsystem" and "kernelrelease"/"kernelversion" does NOT appear. The "name" appears and is correctly labled as Aix, the "environment" appears correctly and the "last report", only the "operating system" values are missing. What can I edit to make these show up? Thanks.</p>

History

#1 - 03/31/2011 11:46 AM - monte olvera

- File *aix_hosts_page.JPG* added

Instead of fixing foreman I changed AIX "kernelrelease" and "hardwaremodel" Factors. I also added an AIX jpg (public/images/hosts/Aix.jpg) to have an icon appear next to the "name" column on the "hosts" page. Only issue now is the AIX icon (other OSes appear to use a PNG: public/images/) not showing under "operating system" column on the "hosts" foreman page. Not a big deal but I'd like to get it resolved.
