fixes #808 - Add smart-proxy puppetrun to foreman

History

#1 - 07/18/2011 10:49 AM - Ohad Levy

puppetrun can be executed via the proxy, but the real question is how does foreman knows which proxy to run on?

at the moment, we have the ability to know who is the puppet master for a given host, but i think we need to break it down to a CA host, and maybe a puppetrun host?
