

Foreman - Bug #810

Init script on RH systems - foreman failed to restart

03/30/2011 08:25 PM - Julien R.

Status: Resolved	
Priority: Low	
Assignee:

Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description It appears that foreman never writes its pid from the init.d script. Adding : daemon --pidfile=\${FOREMAN_PID} solved the problem, and foreman can now restart.	

History

- Status changed from New to Feedback
- Target version deleted (0.3)

I cant reproduce the problem - i.e. that it wont start.

the only scenario when it doesn't start is the database is not migrated or that there are missing dependencies etc.

if you remove your patch, does is stop working?

#3 - 06/28/2012 06:40 AM - Benjamin Papillon

Hello,

Do you still have this issue?

#4 - 07/05/2012 05:08 AM - Ohad Levy

- Status changed from Feedback to Resolved

cant reproduce, works on 1.0
