Description

I'm able to create a usergroup and add users to it but, when I edit a user group I get 2 items on my screen :

"User Groups"

<empty>

-----and-----

"Users"

AdminUser , UserA, UserB etc

There's no option to edit rights/roles of this group. I believe what we should expect here is something like this:

"User Groups"

<in case nested groups are supported>

-----and-----

"Roles"

<Where you could select which role this usergroup gets>

-----and-----

"Users"

AdminUser , UserA, UserB etc
