| Description | |
| As a user I want the loading of puppet classes to go faster since if you have around 20k puppet modules it takes around 20 minutes to load the puppet classes using the foreman smart-proxy. This attached fix introduce a caching mechanism for puppet classes so the puppet manifests are only loaded if the modified time on the puppet module is newer then the latest cache time. See the three attached rb files. | |

Associated revisions

Revision 51c455b9 - 12/17/2014 09:17 AM - Ori Rabin

Fixes #8210 - Adding caching for smart-proxy puppet classes using Stefan Julin's implementation of cache

History

#1 - 10/30/2014 03:53 AM - Stefan Julin

- File `class_scanner.rb` added
- File `environment.rb` added
- File `puppet_class.rb` added

Main change is in the `class_scanner.rb`.

#2 - 10/30/2014 04:37 AM - Dominic Cleal

- Project changed from *Foreman* to *Smart Proxy*
- Category changed from *Smart Proxy* to *Puppet*

If you're looking to contribute the changes, please open a pull request through GitHub, it's how we propose and review patches. <http://theforeman.org/contribute.html> has more information.

#3 - 11/05/2014 04:47 AM - Stefan Julin

Hi Dominic, you are free to review the changes and check it in yourself and add it to a future release.
