

SELinux - Refactor #8256

Foreman should transition to ssh_t domain;

Pull request:	
Description	
Instead of	
<pre>optional_policy(` tunable_policy(`passenger_can_spawn_ssh', ` require { class process { getcap setcap }; } allow passenger_t self:process { getcap setcap }; ssh_exec(passenger_t) ssh_read_user_home_files(passenger_t) `) `)</pre>	
We should do something like:	
<pre>optional_policy(` tunable_policy(`passenger_can_spawn_ssh', ` ssh_domtrans(passenger_t) #ssh_read_user_home_files(passenger_t) # wont be likely needed too `) `)</pre>

This needs to be tested tho, I am not entirely sure if we spawn ssh binary in all cases.
