<b>Category:</b> Compute resources - oVirt	
<b>Target version:</b> 1.13.0	
<b>Difficulty:</b> medium	<b>Fixed in Releases:</b>
<b>Triaged:</b>	<b>Found in Releases:</b>
<b>Bugzilla link:</b> 1189813	<b>Red Hat JIRA:</b>
<b>Pull request:</b> <a href="https://github.com/theforeman/foreman/pull/2350">https://github.com/theforeman/foreman/pull/2350</a>	
<b>Description</b> as a ovirt/rhev user, i would like to use the cloudinit integration described at <a href="http://www.ovirt.org/Features/Cloud-Init_Integration">http://www.ovirt.org/Features/Cloud-Init_Integration</a> from foreman that means applying a user_data template and have it applied when deploying a ovirt/rhev vm from template changes need to be done at the following level -rbovirt to pass a specific body when using vm_action with 'start' action  -fog to pass a user when using vm.start  -foreman to handle user_data and pass it to setComputePowerUp in app/models/concerns/orchestration/compute.rb  make those changes invisible to other compute resources have the two first changes ready , working on the last one
