

Installer - Bug #8301

Add a checker script for reverse DNS

11/06/2014 07:33 AM - Lukas Zapletal

Status: Closed	
Priority: Normal	
Assignee: Chris Roberts	
Category: foreman-installer script	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman-installer/pull/255	
Description	
<p>Since the smart-proxy checks reverse DNS of incoming HTTPS requests, for a wrongly configured box this can fail and installer fails with "Can't register the proxy".</p> <p>We should add a checker that will refuse to continue if reverse check does not match. I think Katello installer already does the check, we can adopt this bit from there.</p>
