Description

I've noticed that when I search for facts, e.g.

facts.architecture = x86_64

it does work on PostgreSQL but not on SQLite. Can someone verify this for me?

History

#1 - 11/07/2014 05:29 AM - Dominic Cleal

Works for me locally with SQLite.

#2 - 11/07/2014 06:05 AM - Lukas Zapletal

- Status changed from New to Rejected

I found the issue, all my managed hosts did not have any facts uploaded. :-)
